

Kaulig Capital Invests in Guardian Dentistry Partners

For Immediate Release

September 29, 2022

HUDSON, OHIO – Kaulig Capital, the private investment firm of the Kaulig Companies, a family office, is excited to announce an investment in Guardian Dentistry Partners (“GDP”), a Dental Partnership Network (“DPN”) founded for dental entrepreneurs who are looking to scale their practices. The majority of GDP is held by NKP Capital, another family office, management and its passionate doctor owners, who reinvested a substantial portion of their equity.

Founded in 2018, Guardian Dentistry Partners is a premier Dental Partnership Network dedicated to providing world-class support services and growth opportunities for its network of dentist partners. Guardian has expanded rapidly and now supports dental entrepreneurs in Alabama, Florida, Michigan, New Jersey, New York, North Carolina, Pennsylvania, South Carolina, Texas, Virginia, and Maryland.

Guardian’s mission is to help its dental partners and teams build the practices of their dreams. Guardian Dentistry Partners is not a typical, corporatized dental support organization (DSO) – instead, the Company refers to itself as a DPN, or Dental Partnership Network. This philosophical difference is key to GDP’s continued growth and network partnerships – GDP is “all-in” on supporting its partners every step of the way. GDP works to bring together purpose-driven, like-minded partners and professionals to create a truly unique partnership experience.

President Mark Censoprano noted, “We are very proud of our growth trajectory since our formation in 2018, which is a testament to our business model, culture and doctor partners. The recent investment from Kaulig Capital alongside our existing ownership group has us well positioned to strengthen and accelerate our platform.”

Dominic Brault, Managing Director at Kaulig Capital noted “GDP provides vital business services support to dentists, allowing dentists to be razor focused on exceptional patient care vs. administrative duties. We love GDP’s highly scalable model and are excited to see how our investment will fuel the already proven acquisition strategy. We believe a larger GDP will have a positive community impact as GDP partners care so much for their patients and co-workers.”

Kaulig Capital was introduced to GDP through multiple channels, including networking with friends of the firm and Dominic Brault’s longstanding relationship with GDP’s President, Mark Censoprano.
